

Simplifying Supplier Payouts for Online Travel Agencies

THE CHALLENGE

As Online Travel Agencies (OTA) continue to thrive in travel booking, coverage limitations and widespread problems with integrating online and offline payment systems across different countries, regulatory and manual reconciliation channels continue to place heavy burdens on OTA's.

Solving Payment Challenges for Online Travel Agencies

TOP CHALLENGES

- Coverage Limitations:** Few payout providers can provide direct access to lucrative emerging travel markets.
- Outdated Payment Systems:** Manual invoicing and lack of integration across payment systems have led to slow and mismanaged reconciliations.
- Cost-Containment:** High transfer fees from bank wires, eWallets and prepaid cards, coupled with hidden interbank and FX markups are extremely costly for OTA's.

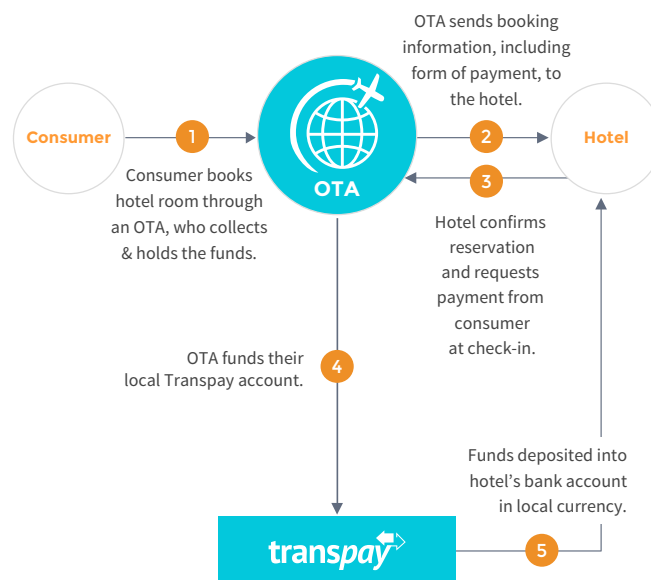

TRANSPAY'S SOLUTIONS

Transpay's global proprietary network can provide direct access to the most challenging travel markets.

With a single API integration to process payouts, OTA's can send local bank transfers to suppliers across the globe using local currencies.

As a leading alternative to bank wires, eWallets and prepaid cards, Transpay bypasses correspondent bank channels to effectively enable significant cost-reductions for OTA's.
